CAS Modbus TCP Parser – A Smart Utility for Analyzing A Series Modbus TCP Message

***The free CAS Modbus TCP Parser, developed by Chipkin Automation Systems Inc. is capable of helping the automation professionals to solve unexplainable problems with their Modbus devices.***

Vancouver, BC – The CAS Modbus TCP Parser, latest version 1.00aA has been released by Chipkin Automation Systems Inc. This smart utility can analyze a series Modbus TCP message, display any error message, what data is being read and/or written as well as what device the messages are coming from.

Additionally, the easy-to-se CAS Modbus TCP Parser debugs errors in Modbus TCP messages and it also reads Ethereal(r) capture logs.

CAS Modbus RTU Parser is completely free and can be downloaded on http://www.chipkin.com/cas-modbus-tcp-parser with zero commitment.
