

## **MatrikonOPC Webcast: How to Install and Configure a MatrikonOPC Server for Modbus**

**MatrikonOPC** announces the release of a new series of MatrikonOPC Support Webcast Training Sessions. These training webcasts are specifically designed to teach attendees how to install a MatrikonOPC Server. The first webcast in the series is scheduled for **Wednesday June 21, 2006 from 1:30 pm to 2:30 pm** (Eastern Daylight Savings Time, USA, Canada). The webcast will focus on the installation and configuration of one of MatrikonOPC's hottest selling products, the MatrikonOPC Server for Modbus.

The MatrikonOPC webcast will be lead by one of MatrikonOPC's top Support professionals, and will guide attendees through the process of installing and configuring the MatrikonOPC Server for Modbus. Attendees will learn all the tricks of the trade, and explore common problems associated with the installation of the OPC Server. This webcast session is interactive, and allows attendees the opportunity to ask the OPC Support expert questions. To have specific issues discussed during this webcast; questions can be emailed to [opcexperts@matrikonopc.com](mailto:opcexperts@matrikonopc.com) prior to or during the webcast.

The MatrikonOPC Server for Modbus is an OPC-compliant server that enables easy data interchange between OPC clients and Modbus-compliant PLCs. Being OPC standards-based compliant, users are free to explore any of the "out-of-the-box" visualization tools such as HMIs, trending packages, reporting tools, and historians. OPC technology makes installation and integration of these applications simple, fast, and effective.

Please join us in the first of a continuing series of interactive instructional webcasts. Let us know if you have a specific topic or idea for a webcast.

To register for this webcast click go to <http://www.matrikonopc.com/training/webcasts/29/index.aspx>. For more information about the MatrikonOPC OPC Server for Modbus go to [www.matrikonopc.com](http://www.matrikonopc.com).

**MatrikonOPC** is the world's largest OPC Server, OPC Client, and OPC Driver developer. MatrikonOPC boasts over 500 interfaces, more than 30,000 users, and over 100,000 installations worldwide. **MatrikonOPC** provides connectivity to every major control system and application on the market today.

These OPC products and solutions are the culmination of MatrikonOPC's extensive experience since 1988 in the design and implementation of device-specific communication drivers. Our vendor interoperability and OPC compliance are guaranteed, which helps make us the global leader in industrial connectivity.

With offices in major cities throughout North America, Australia, Europe and the Middle East and a global client base including industry leaders in a wide range of manufacturing and process industries, **Matrikon**'s reach is global.
